

Die spray systems

single axis reciprocator with revolving support

series 725 / GS-Z/VS

for die casting machines 250 - 1100 tons of closing force

speed: max. 2.2 m/s
acceleration: max. 7 m/s²

standard stroke
800 to 1500 mm

Specification

high speed (high acceleration and braking force)

user-friendly and reliable drive unit with high performance reserves

high weight capacity for the use of customized sprayheads

maintenance-free sprocket belt drive

fully automatic centralised lubrication

all components are completely protected from external influences

oversized spraying medium and air lines for the optimal supply of the sprayheads

use of corrosion resistant materials

use of standard components (fast spare part supply)

Options

4 or 6-circuit-version

prop valve technology

vertical stroke in telescopic construction

left sided version

Die casting machine - die spray system

die casting machine closing force (tons)	die spray system vertical stroke (mm)
250 - 400	800 or 1000
400 - 650	1000 or 1200
650 - 900	1200 or 1400
900 - 1100	1400 or 1500
